What Is Dermatoglyphics?

Dermatoglyphics is a scientific analysis of fingerprint patterns based on the formation and the amount of ridges on the fingerprints. It reveals a person's style of learning, thinking and understanding. The analysis also provides objective information about the personality & behavioral characteristics. Statistically, it's been proven that the accuracy rate of dermatoglyphics analysis is 95%+

Fingerprints and dermal ridge patterns are unique with each person and grows simultaneously with their brain patterns. Each finger represents different abilities, and each pattern has its own definition

How Fingerprints Link With The Brain

- Human fingerprints form during gestation
- Fingerprints formed in the mother's womb have direct correlation with the brain
- Hence fingerprints are our brain maps exposed outside our body

What Is DMIT?

- DMIT is a multidisciplinary approach which scientifically studies connection of our brain with fingerprint
- Logical identification of our best learning style
- Assessment of your prevailing intelligence out of the 8 intelligences
- Helps you to harness your strengths & overcome your weaknesses
- Students can make their learning process more effective leading to better results
- Students can make their learning process more effective leading to better results
- Professionals can leverage their core personality and intelligences to grow their careers
- Couples can improve their relationship by understanding each other's personalities on a deeper scientific basis

What After Taking DMIT?

The outcome of DMIT is a detailed 75-page report that addresses all the following aspects

- Relationship of the brain to our Hands
- Individual personality & behavior
- Learning Style of the individual
- Distribution ratio of 8 different intelligences
- Career Options with Graphs

We provide expert consulting sessions with parents, employers & guardians of the test-taker to provide objective analysis of the test.

Offerings

Psychometric Test

The term 'psychometric' comes from the Greek words for mental and measurement. Psychometric tests are also used to measure an individuals' mental capabilities and behavioural style but adopt a different approach.

They use different types of written tests to evaluate a person's intelligence, aptitude, personality, ability to handle pressure and working style. "BrainOroma" uses psychometric tests to supplement the results of DMIT.

Educational Programs

Our services don't just end at providing a detailed report of the strengths and weaknesses of students. At "BrainOroma", we also offer skill development programs and conceptualize strategies to educate children.

- We help in incorporating with academics, programs targeting different learning styles such as visual, auditory, or kinesthetic.
- We conceptualized programs to help children with different personalities overcome their limitations and improve in areas they usually lag.
- We design workshops to improve the performance of children in the type of intelligence they need special attention. For example, logical, interpersonal, etc.

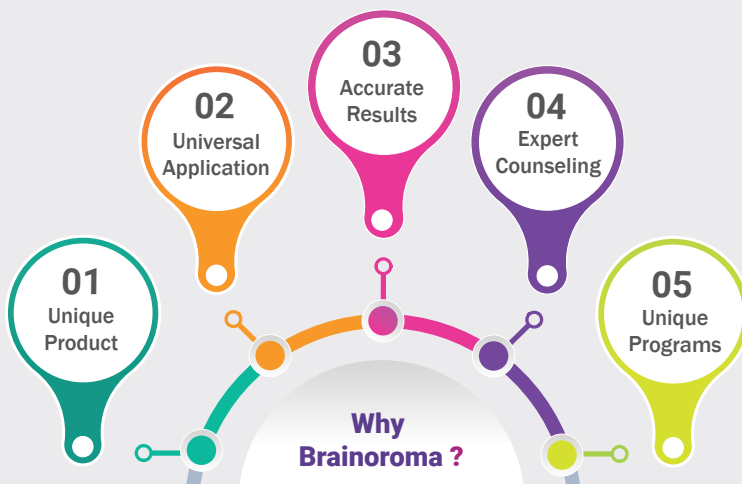

Corporate Programs

Corporates often face issues like attrition, underperforming employees, dissatisfied employees, etc. It is necessary to understand the underlying problem.

It could be a gap in how instructions are communicated by the management to the employees. The services of "BrainOroma" help determine the real reasons why employees are not aligned with organizational goals.

Apart from making you understand the personality traits of your employees we also offer:

- Training programs to improve communication within the organization
- Workshops for skill development of employees

BrainOrama is a change-agent company wanting to transform the age old manner in which:

- Children are brought-up & imparted knowledge at home and educational institutes
- Employees are hired & kept motivated for giving their best for their employers
- The dynamics of Human relationships & the problems faced in interpersonal modern communication

A cartoon illustration of a man with brown hair, smiling broadly with his eyes closed. He is wearing a light blue suit jacket, a white shirt, and a dark blue tie. He is holding a black smartphone in his right hand, which is raised towards his face. His left arm is extended outwards to the side. He is wearing dark blue trousers and black shoes. The background is a solid light gray.
